

## Once In Your Life

Idlewild

To come apart in mountain tops  
is to come apart in rain  
Every note creates a picture of  
a road worn over again  
You speak only in memories  
but what memories dictate  
is if you don't know what you want  
then what you want won't wait  
And he sparks a ten center  
as an epilogue waits  
it's a centre of attention  
and it's a road we won't leave behind  
So far away  
and I'm free from disguise  
but I can see the devil hiding  
in the circles around your eyes  
What do I signify when  
lifetime's away  
I can see that look in northern faces  
and looks are made from far off places  
And maybe the life waits over the hill  
over the hill while I wait
