

The Ultimate Nullifier

If Hope Dies

Bear witness to the destruction
the perversion of life
replacement of the natural
with mechanical precision
the way that man has chosen
is the path of dominance
instead of coexistence
he exerts control over life

we empty out the land and sea transform life into machinery
take apart our foundation
to build our towers ever higher
this is a course we can't sustain
failure is programmed into our plan
the more we take, the less we give the further we fall to
towards failure
the failure of man
is displayed in our actions
the death of compassion
turns us into monsters

subvert the laws of nature
it's all become a process
we've come to rely upon
our factories of death
now we take what is easy
and ignore what is right
we're being consumed by shadows
from our darkest hearts

the failure of man
is displayed in our actions
the death of compassion
turns us into monsters

we cause so much harm
and do so little good
the longer we travel down this path
the harder it is to defend our existence

YEA
LETS GO

the failure of man
is the burden we all share
we've all had a hand
in the execution of this plan
