I see my future shuffling
A shaky step at a time
I got no choice but careful
Thank God I've done my crime
The tools I see on TV
Can't stand it when they fake
A prick's a prick at any age
Why give one a break?

I want to live a little bit longer I want to live a little bit longer I want to live a little bit longer I want to live live live live live

The soul is in the eyeball
For anyone to see
I'm better than a Pepsi
I'm cooler than MTV
I'm hotter than California
I'm cheaper than a gram
I'm deeper thar the shit I'm in
An' I don't really give a damn

I want to live a little bit longer
I want to live a little bit longer now
I want to live a little bit longer
I want to live live live live

Step up it's fight time
Kick scratch and bite time
Ain't talking about no more fun
But that don't bother my bad ass none

I want to live a little bit longer
I want to live a little bit longer now
I want to live a little bit longer
I want to live live live live
Just a little bit longer
I want to live live live live
