

Dreary causes
They yield all the applauses
You've done it all before
You'll dread the encore
And as the tide rushes in
To where you once began

We're only human
No longer human

My intuition
Mistaken for my mission
And your petition, but stay
Lest your tuition remains unpaid
And as you fall in line
You'll know the jones isn't mine

We're only human
No longer human

And I'm to you just an artifact
And still you blame me for the soundtrack
All I can do is sigh
All you can do is cry
'Cause wolves and sheep do rest
Not side by side, still, they rest

We're only human
No longer human
