

When I was younger the world revolved around me  
I dragged those who loved me the most, down to their knees  
I made everyone suffer for me

This is your last night  
You're dead inside, just hold your ground  
Through these troubled times  
Through each passing moment  
And choices you made  
Will stay with you  
We'll find another way to make it through this

You're now at the end of your road  
It's time to raise the white flag  
Abandon this life that you've known  
Stand up and be a man  
Then we'll go to hell and back again  
(Go to hell and back again)

This is your last night  
You're dead inside, just hold your ground  
Through these troubled times  
Through each passing moment  
And choices you made  
Will stay with you  
We'll find another way to make it through this

When you look at your reflection  
Do you like what you see?  
Now you're on the right direction  
Nobody said it's easy  
Nothing in life is free  
Hey

This is your last night  
You're dead inside, just hold your ground  
Through these troubled times  
Through each passing moment  
And choices you made  
Will stay with you  
We'll find another way to make it through this
