Hallowed Ground

We come together Though as one I'm waiting for you To be the one

We come together In this place Something surrounds me So powerful

And when we dance There lies untold Belief and rituals we behold Into the night there comes the cold The door is open

And when we dance There lies untold Belief and rituals we behold You can't escape the hallowed ground The hallowed ground

We come together You and I We come together You and I

And when we dance There lies untold Belief and rituals we behold Into the night there comes the cold The door is open And when we dance There lies untold Belief and rituals we behold You can't escape the hallowed ground The hallowed ground

And when we dance There lies untold Belief and rituals we behold Into the night there comes the cold You can't escape the hallowed ground
