

# Naked Heart

Ilse DeLange

I`ve been lookin` at you, lookin` at me  
And somethin` tells me that  
This could be a once in forever thing  
So why are you holdin` back

No more smoke and mirrors  
I need to know how deep you feel  
If you really want me baby, if you really want me, yeah

Chorus:

Wrap me up, get too close  
Completely let yourself let go  
Baby your soul, go too far  
With your loves tripped down, no walls no bars  
Baby come to me  
With a naked heart

I have had more than my share of secrets and lies  
And calculated mysteries  
So this time I need to be sure you`re mine  
Truly honestly

Surrender, don`t just hold me  
To really love me you got to show me  
You`re strong enough now baby  
To let yourself be weak

Chorus:

Wrap me up, get too close  
Completely let yourself let go  
Baby you`re soul, go too far  
With your love stripped down, no walls no bars  
Baby come to me  
With a naked heart

Wrap me up, get too close  
Completely let yourself let go  
Bare your soul, go to far  
With your love stripped down, no walls no bars  
Baby come to me  
With a naked heart
