

# When You Put It Like That

Ilse DeLange

It's been a long week  
And I've had a lot of time to think about you  
So sure that I'm right  
In thinkin' I'll be more than fine without you  
Here you are with a guilty grin  
Knockin' at my door again  
We both know you're gonna win  
When I'm in those arms of yours

I can't turn my back  
When you put it like that, put it like that  
Right here in front of me, is all I'll ever need  
And when you touch me like that  
Hold me like that, love me like that  
Forever sure sounds good  
When you put it like that

So much for being strong  
My mind's set but my heart's too gone to save me  
I'd like to think I gotta choice  
And deep down that little voice don't phase me  
When I see you standing here  
Everything is crystal clear  
And all my doubts just disappear  
When you're holdin' me like this

I can't turn my back  
When you put it like that, put it like that  
Right here in front of me, is all I'll ever need  
And when you touch me like that  
Hold me like that, love me like that  
Forever sure sounds good  
When you put it like that

When I see you standing here  
Everything is crystal clear  
And all my doubts just disappear  
When you're holdin' me like this

I can't turn my back  
When you put it like that, put it like that  
Right here in front of me, is all I'll ever need  
And when you touch me like that  
Hold me like that, love me like that  
Forever sure sounds good  
When you put it like that
