## **Start Over**

## **Imagine Dragons**

Clenched teeth, no words All this distance taking its toll Speaking volumes Silence screaming over your words I never did you right, I know that Too many sleepless nights, I own that I said it time and time, I know that I wanna try again

Can we start over? Can we start over? Can we start over Before it's over, over?

Cold nights, cold sheets One more lonely empty hotel room What I'd give to Find my way back into you I never did you right, I know that Too many sleepless nights, I own that I said it time and time, I know that I wanna try again

Can we start over? Can we start over? Can we start over Before it's over, over? Can we start over? Can we get closer? Can we start over Before it's over, over?

Come alive, come alive, come alive again Come alive, come alive, come alive again Come alive, come alive, come alive again Come alive, come alive, come alive again

Can we start, can we start over? Can we start over? Can we start over Before it's over, over? Can we start over? Can we get closer? Can we start over Before it's over, over?
