

I Long For You

Imany

So I drove around in a little car
Pulled over end up in a bar
My loneliness is my better half
I've been gone more than I can count
I made a wish upon the stars
Just to see if you come back

I long for you
I long for you
I ache, it's true
I long for you
I long for you
I long for you
I ache, it's true
I ache, it's true

You never write no words no letters
You say in love it doesn't matter
You sing a song I can't remember
Lost that tune for now and never
Come over me I'll wait by the shore
For the wind to knock on my door

I long for you
I long for you
I ache, it's true
I long for you
I long for you
I long for you
I ache, it's true
I ache, it's true

I long for you
I long for you
I ache, it's true
I long for you
I long for you
I long for you
I ache, it's true
I long for you

So I drove around in a little car
Pulled over end up in a bar
