

Winter of the Ages

Immortal

Music: Abbath

Lyrics: Demonaz

I stride puposefully through the snow
To the icy vasts at dusk
Crystals swirl by northed dim
Majestic be this winter
Winterdemons winterbeasts
Further my visionary means
Blast into dominance
Milleniums filled with pride
Winters of hate winters of pain
Winters of sorrow
These winters awaits
Nebular fog aurora fog
Await us all in this seasonal cold
I stride puposefully through the snow
To the icy vasts at dusk
Drawn by our will
From the coldest regions
An ice age comes
Minds into the elder dryas
Majestic panorama
Across the lands
Our mark shall flow
Winters of hate winters of pain
Winters of sorrow
These winters awaits
Nebular fog aurora fog
Await us all in this seasonal cold
