Winter of the Ages

Immortal

Music: Abbath Lyrics: Demonaz I stride puposefully through the snow To the icy vasts at dusk Crystals swirl by northed dim Majestic be this winter Winterdemons winterbeasts Further my visionary means Blast into dominance Milleniums filled with pride Winters of hate winters of pain Winters of sorrow These winters awaits Nebular fog aurora fog Await us all in this seasonal cold I stride puposefully through the snow To the icy vasts at dusk Drawn by our will From the coldest regions An ice age comes Minds into the elder dryas Majestic panorama Across the lands Our mark shall flow Winters of hate winters of pain Winters of sorrow These winters awaits Nebular fog aurora fog Await us all in this seasonal cold
