

# Bad Body Double

Imogen Heap

She pops into the bathroom  
Just after a shower and  
She plays with my makeup and creams  
Keeps trying to look like me

And goes through the motions  
Posing this way and that,  
Holding it in,  
If it makes you feel better, then knock yourself out

Say hi there to my bad body double  
This is my bad body double trouble  
Oh no, my bad body double, mmmhm  
I've got bad body double trouble, oh.

She's trouble  
She's trouble  
She's trouble, alright.

Yeah, yeah

Sometimes I manage to lose her  
Shake her at a bar, in the gym for five minutes  
It feels so good to be back to my own self again  
Can get quite confusing.

We look very similar except she's got some grays and  
A little extra weight on the sides  
And dimply thighs,  
I hear that stuff's a bitch to get rid off  
(No, no, no, no)

We're having quite an intimate, personal moment (not now)  
Could you maybe come at a slightly less awful time? (not now)  
She can see I've got someone quite nice here with me  
Can't we just be left alone...  
I guess that's a no then  
Seeing as you're still here  
Seeing as you're still here  
Here

It's not me, no  
It's my bad body double  
I got bad body double trouble  
Oh no, my bad body double, mmmhm  
I've got bad body double trouble, agh.  
Bad body double, mmhm.  
I've got bad body double trouble  
Oh dear, my bad body double.  
I got bad body double trouble.

She's trouble  
She's trouble  
She's trouble, alright.  
Yeah, yeah, yeah  
She's trouble  
She's trouble

She's trouble, alright.  
Yeah, yeah, right there.

Can't shake her, Can't shake her, Can't shake her, Can't shake her  
Everywhere I go, Everywhere I go, goooo  
Can't shake her, Can't shake her, Can't shake her, Can't shake her  
Everywhere I go, Everywhere I go, goooo

Say hi there,  
To my bad body double  
My bad, bad, bad body double.  
She's trouble  
I can't shake her  
And I hate her, I hate her, I hate her, I hate her, I hate her.  
She's everywhere I go,

I'm going to get rid  
Of you once and for all...
