

Dead Eternity

In Flames

You'll never be along again
You'll never die again
You'll never be born again
You'll forever be, stuck here in eternity

I bid you welcome to my world
They call me existence
You have just entered through the gate
to your journey towards eternity

This part I control (This part I control)
This part I control (This part I control)

In the beginning you'll fear nothing
As I climb beside you
Time will be your master
in this laborious part of human subsistence

This part I control (This part I control)

Black clouds embraces your soul
Slowly passing through
repeating lacunas of anguish
When time takes your life

I wil transfer you into
the bare grip of thinking tranquillity
Voices frilling the emptiness of the dead

floating seamless across the surface
into chilling stillness
Nothing can help you now

Nothing can help you now

You'll never be along again
You'll never die again
You'll never be born again
You'll forever be, stuck here in eternity
