

# Save Me

## In Flames

So save me

Here's a hammer  
Build a ladder  
It's a long way up to heaven  
If I dig it might take as long  
But maybe in hell that's where I belong  
Seven days and seven nights  
Funny he found the fires  
And I have walked this path before

I'm afraid I'd lose it all

Somebody save me  
Somebody save me  
I've been trying so hard  
But who can't see that far  
So save me

Just let it rain  
I rather stay away  
From laps on the comet  
And the company of gross  
Memories they fade  
But I'm far too awake  
Welcome to my dream

I'm afraid I'd lose it all

Somebody save me  
Somebody save me  
I've been trying so hard  
But who can't see that far  
So save me [2x]

So save me  
(Save me)

Just let it rain  
I rather stay away  
From laps on the comet  
And the company of gross  
Memories, they fade  
But I'm far too awake  
Welcome to my dream

I'm afraid I'd lose it all

Somebody save me  
Somebody save me  
I've been trying so hard  
But who can't see that far  
So save me

Save me  
(Save us)  
Save me

(Save us)  
I've been trying so hard  
But who can't see that far  
So save me  
Save me [4x]
