

Eye Of Heaven

In Strict Confidence

Broken-hearted
The moon leaves earth
Looking for a new world
To protect and serve

To avoid the danger
Of increasing heaven's space
My eyes covered with blindness
Diving into endless grace

As long black rainbows fight the light
Conquer and turn dawn into night
Holding on
Going down
The sun takes off her crown
As long as stars brighten the sky
As long as time is passing by
Protect the eye of heaven

Celestial bodies
Nestling close to me
In search for shelter
And security

Dust of clouds
Cover desert sky
To save us from a demon's seed
The seas run dry
