

Silver Bullets

In Strict Confidence

Feel the pain of burning skin
Fire bursts out from within
Rage is running through my veins
Like satanic labor pain
One sweet bite cursed me for ages
Now I long to taste the blood
Ancient forces - ten dead horses
Drag me deep into the flood

They say only silver bullets
Kill the beast inside
Silver bullets cast at midnight
In the full moon's light
They say only silver bullets
Kill the beast inside
Headshot - bloodspot
On my screaming bride

Feeding on your innocence
My heart is cold as stone
My pious words were mere pretense
And now you're all alone
I am howling in the darkness
Tearing at your soul
Hear my scream - in your dream
Now I'm in control

They say only silver bullets
Kill the beast inside
Silver bullets cast at midnight
In the full moon's light
They say only silver bullets
Kill the beast inside
Headshot - Bloodspot
On my screaming bride
