

I feel the pressure is building in me
My stomach's sick, it's getting harder to breathe
I hear the screaming, I feel the disease
It's burning me up and there is nothing to breathe

Will you crawl with me
Will you stand with me
Would you follow me
Would you believe with me
Tell me you'll breathe with me, tell me you'll die with me

Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Yell it out, do or die
Let me hear your war cry

We wanted peace but you brought this war
We took enough but we can't take anymore
With our fists in the air, we'll burn it all to the ground
We will tear your fucking empire down

Will you come with me, will you stand with me
Would you fight with me, would you believe with me
Someday you'll bleed with me, someday you'll die with me

Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Yell it out, do or die
Let me hear your war cry

We wanted peace but you brought this war
We wanted peace but you brought this war
We wanted peace but you brought this war
We took enough and we won't take anymore

Will you come with me, will you stand with me
Would you fight with me, would you believe with me
Someday you'll bleed with me, someday you'll die with me

Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Come on, get on, let me hear your war cry
Yell it out, do or die
Let me hear your war cry (2x)

Let me hear your war cry
