

## Good Love

Incognito

If you believe that you get out what you put in  
You better move on 'cos there's no time to fool around  
All the right intentions & promises don't mean a thing  
If you can't get the job done

If you insist on making life a compromise  
You're gonna wake up to find your world has come undone  
All the right intentions & promises are never enough  
And soon you find it all gone

Now time has come, make up your mind to be real  
Baby, baby, baby

Good love, precious & gifted  
Can't stand waitin' forever  
Good love, no greater feelin'  
No one could ever deny  
Stop wastin' all the good love

You're takin' your time comin' to let me know  
Now you better decide 'cos there's a limit to your games  
Let your intuition lead you on  
Follow the signs to the place you belong  
If you believe that you get out what you put in  
You better move on 'cos there's no time to fool around  
All the right intentions & promises don't mean a thing  
If you can't get the job done

Now time has come, make up your mind to be real  
Baby, baby, baby

Don't go wastin' good love  
Now time has come, make up your mind to be real  
Baby, baby, baby

[Chorus until fade]
