

The Winter Of My Springs

Incognito

Something 'bout April that makes me come alive
May have been the winter that made my heart so still
It must have been, must have been
What wakens us all to wonder I don't really know
But the best days of my life are the ones I spent with you
So continue to surprise me
Baby, I'll do the same for you
No, I won't question why it feels so good
I'll let the mystery be
As long as it's you
As long as it's you
Anytime, anywhere, I don't care
Just as long as it's you
Thank you for your understanding
'Cause I know my love can be so demanding
(I know that I can)
Yes, I know that it means so much to you
Baby, when I treat you right and I'm holding you tight
Tears of joy come to your eyes like stars about to fall
Continue to still want me the way I still want you
I won't question why it feels so good
I'll let the mystery be
