

slashing up humans gets him off  
bits and pieces, small and soft  
freezer bags store his mess  
those human remains always kept fresh  
sharpens his blade after each one  
preparing for another slice o' fun  
still they laugh like he's a joke  
but they can't laugh, without a throat  
a new selection sounds just great  
release the tension, even out some hate  
pressure builds, can only control it  
by satisfying his stainless steel dick???
