

Flesh Menagerie

Informatik

The night is young, so turn up the energy
Alter the mood with electrochemistry
Things yet to come; ripe with possibilities
You--you and me--can spend the night in ecstasy

Our destination charted
New worlds to be explored
Prepare to go to places
You've never gone before

Won't you come out to play
In my flesh menagerie?
All your fears will melt away
As the night turns into day

In our rapture we are as one

Look into my eyes and realize our fantasy
Dreams and desires made into reality
Burning in my soul etched into my memory
Everybody knows three is really company

See the light; a new tomorrow
Free your mind; I will follow
