

Look at the world
It's a complicated place
And it's hard to keep the pace
You've got to wear a smiling face

But what we've got
Is a blue-light special on truth
It's the hottest thing with the youth
You've got nervers we need to soothe

If you've got to believe in something
Believe in us we make it easy
Peace and love incorporated

Shop around
See if you don't agree
We think it fits you to a "t"
And the best part is it's free
I believe

We got the market cornered this time
We can make you feel fine
It could impact your bottom line

If you've got to belong to something
Belong to us we'll make you pc
Peace and love incorporated

Peace and love
It's the newest cause by far
And we've got all the biggest stars
Get your politics up to par
