There's something strange going on right here I can't explain, what's going on right here There's that look to every street And my heart just skipped a beat I feel like there's someone watching And I feel like there's someone listening I'm all alone and the night surrounds me But I feel that something's found me There's something in the air and girl, you drive me wild

You can turn me on all night Something in the air, treat me like a child You can lead me on all night

There's a touch, I've never felt before There's a song, I've never heard before There's a light in every window And a fire behind every door

I feel like there's someone watching And I feel like there's someone listening I'm with you and your warmth surrounds me And I feel that love has found me

Something in the air and girl, you drive me wild You can turn me on all night Something in the air, treat me like a child You can lead me on all night

I know what you know, I feel what you feel I know what you know, I feel what you feel I know what you know, I feel what you feel I know what you know, I feel what you feel

Something in the air and girl, you drive me wild You can turn me on all night Something in the air, treat me like a child You can lead me on all night

Something in the air and girl, you drive me wild You can turn me on all night Something in the air, treat me like a child You can lead me on all night

I know what you know, I feel what you feel I know what you know, I feel what you feel I know what you know, I feel what you feel I know what you know, I feel what, I feel what you feel
