

created with a great purpose
a grim scenario , reprogrammed to destroy
out of control , autonomous , replication
horrendously re - engineered nano machines devour
fear the nanoscourage , nothing will remain
life will be erased, no where left to run
a silver cloud grows, blanketing the sky
fear the gray goo
out of control, autonomous , mutation - self replication
horrendously re - engineered nano machines devour
doomsday device, bio virus , nano terrorism
consuming all living matter
the engines of creation
ecophage, consuming all
the earth will be reborn
into a glowing metallic broth of
self replicating nano machines
remolding all matters in their own image
engulfed in molecular mutations
nanoscourage !!!!!!!
engulfed in molecular mutations
