

Away With the Faeries

Inkubus Sukkubus

Come and lay down in the meadow
Rest your head amongst the flowers
Come and sip the sacred poison
Fly away on the wings of madness
They were once known as angels from the sky and heaven
But now they are known as devils, demons, alien monsters
Chariot of psilocybe
Take me up to ride the lightning
Can you hear their feet are dancing
Can you hear their voices singing?
They were once known as angels from the sky and heaven
But now they are known as devils, demons, alien monsters
Let them fill your dreams with wonder, fever, pain and passion
Let them fill your head with thunder
On a toadstool painted scarlet
Sits a queen, a faery harlot
She will lead if you will follow
Down the road that leads to sorrow
From the Dreamworld she is calling
Come to me, come running, falling
Come and sip the sacred poison
Come and sip my sacred poison
4xThey were once known as angels from the sky and heaven
But now they are known as devils, demons, alien monsters
Let them fill your dreams with wonder, fever, pain and passion
Let them fill your head with thunder
