## **Kiss of Hades**

## **Inkubus Sukkubus**

The night is cold and filled with pain
And a cruel wind drives home the blissful rain
But underneath this neon light
A dream away is paradise

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

The lost souls line the concrete wall Their blank eyes of death, they tell it all Of shattered dreams and ruined lives A dream away is paradise

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

In despair, he's all around And the dark claws of hell drag you down And death has wings and time it flies A dream away is paradise

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

Come and take the kiss of Hades He will save you, sorrow's babies Your final saviour stands before you He will love you, he'll adore you

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator

Come and take the kiss of Hades All you gents and all you ladies Before you stands your liberator The loving god, annihilator
