

Melancholy Blue

Inkubus Sukkubus

Two broken angels against the storm
Alone together beneath the electric sky
Two star-crossed lovers in the night
With you I'm born again and love is blind
It's been so long, so very long
A myriad stars alight when we are one
Two star-crossed lovers in the night
Liquid fire runs through my burning heart
We rise together in the night

With you I'm born again and love is blind

It's been a million years
I've cried a billion tears
With you, with you, Melancholy Blue

The fates have bound our souls as one
My love, together we are a flame divine
The dice are cast, the cards are turned
For life eternal, I'm yours and you are mine

Underneath the stars above
You and I, my only love
Drag me down, my fallen angel
I'm a fool for you, my fallen angel

Fallen angel, fallen angel, fallen angel
Falling from the sky
