I saw your kill
The threat was real
Well take cover baby, it's not safe
In villains only
We stab throats
Well take cover baby, it's not safe

I'm making love to my sound machine We're armed and ready, it's not safe I'm making love to my sound machine

Stop You're so pathetic You're all the same Go We'll take it from the top Yeah

What's that? It's all new We make love, we make love, we make love We're making love to my sound machine We're armed and ready Are armed and ready We're making love to my sound machine It's all good, it's all good I make love to my sound machine Armed and ready Armed, armed and ready I'm making I'm making I'm making Armed and ready Armed, armed and ready
