

## If I Could Turn Back Time

InnerWish

Freezing crazy inside the corners of my mind  
Getting closer to life time I left behind  
Scenes and memories from the past have come along  
So the nightmare starts to grow.

Broken pieces of a life I've tried to live  
Things and meanings now it's late for me to give  
I have nothing to expect, but a thousand to regret  
From this alcoholic cell

Helpless standing in the crossroads of this world  
Among the things I've lived and done

If I could turn back time  
I would try to leave the world behind  
If I could turn back time  
I would hold you by my side  
Cause now that death is closer  
Calling out my name  
I can finally understand  
Only little things are made to last forever.

Streets are friends, the city's getting hard with me  
Now the burning sense for living trying to be  
Winter days are coming in the heart and mind  
Only sorrow there is to find.  
Wasted mornings, windy nights are all the same  
Cannot feel the bell that's chiming in my brain  
I have nothing to forget, nothing secret to respect  
From this alcoholic cell.
