

Natural High

Insolence

I never have to question
question what is me
Clones think they know but still can never see
Blessed with the earth, the earth and dirt is me
Thoughts will dawn and flow like a river upon this CD
Take a walk with me across the galaxy to see how far you get
Don't worry and don't fret
We're traveling the place
the earth and outer space like a shooting star
The planets now are ours

I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher

With the destructive powers man toils
INS crew has the plan to straight spoil
Worshipping the rock they got upon a glass and foil
Natural high we ride is from the soil
Cultivation of God's creation
we're made from the earth and
the earth's vibration
One love for earth the green
and the human being and
everything this ire life brings

I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher
I'll take you there
I'm gonna get ya higher

I believe that when we're alone
nothing's complicated
And I can see with my own eyes look what we've created
And I believe inside you'll find
something that is dear
and I know my heart will find
the only thing that's real
Love

One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I

I'll take you there
I'm gonna get ya higher
I'll take you there

I'm gonna get ya higher

One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
One love to the earth and I One love to the earth and I
