

# Anywhere

Interpol

We try to invade  
Put some of us in each  
At least try hold the other  
In the right light

This sky's gonna break  
Some of us die heroes  
At least they'll never suffer  
At least they'll always

See the ocean  
I could go anywhere  
I could go anywhere  
So free in my place in the sun  
I could go anywhere

You know all about me  
That's what's so frightening  
You know all about me  
Seems my moon is traveling

We try to engage  
Softened up by peace  
At least i had my taste  
Of the nightlife

Be kind to the babes  
'Cause someday you might need them  
At least they'll never suffer  
At least they'll always

See the ocean  
I could go anywhere  
I could go anywhere  
So free my nature to run  
I could go anywhere

You know all about me  
That's what's so frightening  
You know all about me  
Seems my moon is traveling

You know all about me  
I won't be tied with heartstrings  
I search high and low  
Seems my moon is traveling

Always

See the ocean  
I could go anywhere  
Besides my only care's me  
And my face in the sun  
I could go anywhere
