Doctor

We're all running fast tonight Rocket shoes on our feet There's a planet where it's right I'm sure we'll get there by next week

I could've been a doctor I could've been a lawyer I could've been a scientist I could've been normal Especially in the daylight

You say don't worry while in flight The darkness is like a fog I won't get scared I won't get tired I've been in space so damn long

The earth is just a big blue dot I can't see the cars and planes There's a planet where it's right I'm sure we'll get there by next week
