

Adrian's Ladder Part III - Everytime It Rains

Ion Vein

You may remember me
I am the man in the vest
You told all your secrets to me
As I lay dying
You held out your hand
The pain was in my heart
And when you smiled at me
It started to rain

Every time it rains
I always think of you
The face you almost see
Inside your mirror is me
Every time it rains
Every time it rains

The light is calling me
But dream these words I must say
Your dreaming eyes will never see
All you did for me
You held out your hand
The pain was in my heart
And when you smiled at me
Rain

Your ladder brings you up
Your ladder takes you down
The choice you have to make
Is which rung to stand on

You've helped me all you can
You've been so much more than kind
Now you can leave the mirror
And I promise I'll be fine
And I'll think of you today
Every time it rains

Every time it rains
I always think of you
The face I see it clear
So far and yet so near
Every time it rains
You held out your hand
Every time it rains
The pain was in my heart
Every time it rains
Every time it rains
