

## Lands of Fire

Iris

I'm crawling with fever  
I'm sinking in deeper  
I've reached but the water's no good  
And so I'm gonna carry on

I'm dying and breathing  
Was my own deceiving  
In this life alone  
I'll be so hard pressed to carry on

When the journey started  
When I knew I'd make it home  
I was all for trying  
'Til the path had led me wrong  
Then I heard the warning  
Yeah I knew it was to come soon  
It cannot be refused

Aware is the vulture  
It recently circles  
My eyes going dry  
Yes I'm sure I'll soon become the carrion

The west way goes eastern  
And right where the beast yearns  
A void lies inside  
Now I'm here and there can never be return

When the journey started  
When I knew I'd make it home  
I was all for trying  
'Til the path had led me wrong  
Then I heard the warning  
Yeah I knew it was to come soon  
It cannot be refused

Few ever reach stars  
Call to the healer  
Divide the red tide  
It's surely reached us  
But I can't escape it  
Everything I just don't love  
Anything that I see  
No, I just don't love  
Anything that I see
