## **Slower Than Guns**

## **Iron Butterfly**

Can you feel the manmade mist As it starts to twist your lungs? Slower than guns

Breathe deep As you enter sleep Fell secure it's all around you

Can you see the golden brown As it circles round your town Town coming down

Smokin' stacks on industry's backs In this land of a cigarette pack Feel secure there all around you

Miles and miles of gasoline fumes In the air like transparent tombs Feel secure there all around you

DDT making bugs relax There in your food like poison tacks How about that

Eat well there all within you Town coming down
