## **Follow The Sign**

Just like the road that leads to nowhere Riding the time like there is no tomorrow Obey the voice that speaks from the inside Through the darkness and into the light

From the shadows and the underground From the dungeon faith is rising The spell is broken and the curse is gone A deadly omen back from the past The clock is ticking - end of the hourglass Time for justice, now it's payback It's the calling and the gathering Dawn of glory - no fear nation

The ghost of failure is dead and gone with the wind Guardian angel spread your wings and fly away

Just follow the sign Through fire and water Follow the sign

Follow me

Like an arrow through the thunderstome In lightning heaven just like lightning See it coming, with the speed of sound In the moment a free spirit

The ghost of failure is dead and gone with the wind Guardian angel spread your wings and fly away

Just follow the sign Through fire and water Follow the sign Through pain and slaughter Metal is rising here tonight Metal is rising you see the light

The crusade that never dies Is been here since the dawn of time Metal troops you can defy The time is right here tonight

The crusade that never dies Is been here since the dawn of time Metal troops you can defy The time is right here tonight

Just like the road that leads to nowhere Riding the time like there is no tomorrow Obey the voice that speaks from the inside Through the darkness and into the light

And fly away

Just follow the sign Through fire and water **Iron Fire** 

Follow the sign Through pain and slaughter Metal is rising here tonight Metal is rising you see the light

Metal is rising
