## **Ice-Cold Arion**

A planet far away long forgotten savage land Before the aliens became a part of the masterplan A landscape of harmony - so beautiful and crystal clear The arrival at Arion turned fire and ice into fear

Came as strangers and took the peace Sent on a mission, to spread the evil disease

At the ice-cold Arion Where the snow is falling down At the ice-cold Arion Keep the throne and the crown At the ice-cold Arion

A galaxy of pain, a twisted picture of the doctor's wrath One step closer to the Armageddon and the evil path When the line is crossed, there's no way back - no return A frozen enemy deep in the snow - hellfire will burn

Came as strangers and took the peace Sent on a mission, to spread the evil disease

At the ice-cold Arion Where the sky is turning black At the ice-cold Arion Feel the wind is coming back At the ice-cold Arion Came as strangers and took the peace Sent on a mission, to spread the evil disease

Ice-cold Arion Where the snow is falling down Ice-cold Arion Keep the throne and the crown Ice-cold Arion Where the sky is turning black At the ice-cold Arion Feel the wind is coming back At the ice-cold Arion
