

Metal Messiah

Iron Fire

Behold the steel, this is for real
Tonight the master command
Coming for you, know what to do
With hands in the air, make a stand

Can you hear the voice from below
Can you see the path where to go
We all kneel down to the

Metal Messiah
Creator of thunder
Metal Messiah
Lightning from down under

You feel the heat, punch from the beast
The magic is smashing the sky
All standing proud, we make it loud
The legions that no one can buy

Can you hear the voice from below
Can you see the path where to go
We all kneel down to the

Metal Messiah
Creator of thunder
Metal Messiah
Lightning from down under

Keepers of the universe
Bring us metal at birth
Keepers of the universe
Bring us metal at birth

Can you hear the voice from below
Can you see the path where to go
We all kneel down to the

Metal Messiah
Creator of thunder
Metal Messiah
Lightning from down under
Metal Messiah
Metal Messiah
Metal Messiah
