

Ten Years In Space

Iron Fire

Back in time, ten years ago
I heard a call of a hero
Stand the ground until the end
Straight into hell I was sent
We were told to hold the line
What to do, where do I sign
Do your best to earn the crown
Nothing said in hell I drown

The years have passed and still I carry on
The best days of my life are gone

Ten years in space, ten years
Mankind's fall from grace
The years in space, ten years
Humanity shows its ugly face
Ugly face

In the dark I not alone
Endless days of agony
I fight my own misery
I guess this was my destiny
They told me lies and I was blind
Lost and found by the killing kind
Young and brave they made a slave
Now I kick back to the grave

The years have passed and still I carry on
The best days of my life are gone

Ten years in space, ten years
Mankind's fall from grace
The years in space, ten years
Humanity shows its ugly face

I kick and I break you
Dominate and I take two
I hate and fall through
I die but I love you
I kick and I break you
Dominate and I take two
I hate and fall through
I die but I love you

I carry on

Ten years in space, ten years
Mankind's fall from grace
The years in space, ten years
Humanity shows its ugly face
Ten years in space
