

# Speed of Light

Iron Maiden

Another time another place  
A hollow universe in space  
I took a trip to see the sights  
That will be blacker than the night

One way ticket no returns  
My shooting stars are vastly burnt  
On the edge that you can see

Let's shoot the moon you and me  
I'm not particular you'll see  
Just a lonesome galaxy

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

Shadows and the stars  
We will not return  
Humanity won't save us  
We slip into the night

I'll say a mass for you and wave  
Shooting plasma from my grave

Event horizon lost in space  
Running in a human race

I don't know where I don't know why  
But somehow back in time again  
I'm on the edge that you can see

I'm not particular at night  
A single party calling me  
You won't be tracking me by sight

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

Shadows and the stars  
We will not return  
Humanity won't save us  
We're slipping through the night

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

Shadows and the stars  
We will not return  
Humanity won't save us  
At the speed of light

We're slipping through the night
