

# Burning Heart

Iron Savior

Who do you think you are  
To tell us what to do  
What makes us minor to you  
We don't need advice  
We don't need no smartass talking  
Look at yourself and keep on walking

Leave me alone  
With all your words of wisdom  
For once and all  
For once and all time  
This is the bottom line

Take your life  
Live it your way  
Forge it in the amber  
Of a burning heart  
Living  
For tomorrow  
Taking on the future  
With a burning heart

Blinded by conformity  
Obedience and rules  
Now who are you to call us fools  
We won't adapt  
We are different, we're unique  
And your egomania  
Makes me goddamn sick

Leave me alone  
I'm gonna make it on my own  
For once and all  
For once and all time  
Here is my bottom line

Take your life  
Live it your way  
Forge it in the amber  
Of a burning heart  
Living  
For tomorrow  
Taking on the future  
With a burning heart

We don't need your guiding star  
No need to tell us who we are  
Leave us alone  
For once and for all time  
And once again  
Here comes the bottom line

Take your life  
Live it your way  
Forge it in the amber  
Of a burning heart  
Living

For tomorrow  
Taking on the future  
With a burning heart

Live - for tomorrow  
Live it your way  
A burning heart  
Live - for tomorrow  
Taking on the future  
With a burning heart and soul  
A burning heart and soul
