Come Live With Me

Isaac Hayes

Of all the things I want in the world Is to have you to come live with me And be my girl You see, I've done a lot of playing around Big cities and some smaller towns A lot of girls, they knew my name And were fascinated by my game But finally there comes a time When one leaves his past behind Because he meets a girl like you The likes of which he never knew Love is here And I know it's here to stay So please, my dear, believe me when I say Just as long as fire is hot Girl, you have all the love I've got Come live with me, girl I've never been in love at all Never thought I'd ever fall But you touched my heart and soul And you took complete control Everyday you're on my mind I think about you all the time Just how beautiful it would be If you were constantly with me Making love with you Is a joy I've never known I know you feel it too So let me take you home 'Cause just as long as fire is hot Girl you have all the love I've got Come live with me And just as long as the world is round I swear, I'll never let you down Please live with me, girl I'll try very hard to be The man that you want me to be I'll do anything to satisfy I don't want to make you cry True love and security Are two things a women needs And these things I promise to give Just as long as I shall live Love is here And I know it's here to stay So please, my dear, believe me when I say Just as long as fire is hot Girl you have all the love I've got Come live with me, girl And just as long as the world is round I swear, I'll never let you down Please live with me, girl Just as long as fire is hot Girl you have all the love I've got Come live with me, girl And just as long as the world is round I swear, I'll never let you down

Come live with me, yeah, yeah And just as long as fire is hot You know, you've have all the love I've got Come live with me, girl And just as long as the world is round I swear, I'll never let you down Please live with me And just as long as fire is hot Girl, you have all the love I've got Come live with me, yeah And just as long as the world is round I swear, I'll never let you down You got to promise me that you'll Come live with me And just as long as fire is hot You know that you have all the love I've got Come live with me
