There is no time tomorrow

Now the end is near

You can hear them cry and the winds of fear

The morning light is sorrow Filled with death and pain You can see the clouds of acid rain

Everyboby fights for their lives
The light is gone, it will forever be winter

Atomic winter
You don't have the time for another prayer
Atomic winter
Because the angel will come and get you soon

There is no life tomorrow

It is the end you see

All our time is gone for you and me

The day has turned to dawn

Now the night is hear

All the people cry a single tear
