

## Disappear (Remember When)

Issues

Remember when I didn't need you  
Well I need you now  
To hold my head up high say it's all better child  
Remember when

Some days I feel like a saint, I'm so alive  
Some days I can't make any moves  
It's like I have no spine  
Can't do anything right  
And when midnight comes I've run out of time to  
Make some kind of difference  
But I realize I constantly overlook the impact I've made  
Maybe I'm longing to change my own face  
To make you proud, I wanna make you proud  
When you're looking down on me

My mind's wide open like starry skies  
I ask God questions and wonder why  
The hell that you're not here  
I wanna disappear with you now

But I'm a selfish broken heart and how I got this far  
Coping with the thought of holding you a minute longer in my arms is beyond  
me  
I set you free, but I feel so guilty cause  
I take every sunrise for granted  
Sometimes I forget your voice I can't stand it  
Am I wrong for moving on

A product of a free world  
Take wing over the coast of a better day  
I'm stuck in my dark days  
But I can be stronger than you remember  
We're coming up on December, but I'm not cold

My mind's wide open like starry skies  
I ask God questions and wonder why  
The hell that you're not here  
I wanna disappear with you now

But I'm a selfish broken heart  
I wanna see what you see  
I wanna be where you are

My mind's wide open like starry skies  
I ask God questions and wonder why  
The hell that you're not here  
I wanna disappear with you now

Remember when I didn't need you  
Well I need you now  
To hold my head up high say it's all better child  
Remember when I was alone and crying out  
You will be missed  
But I know you're all better now
