

# Black December

It Bites

I'm really very happy with the love I've found  
A faking act of passion on the killing ground  
But I'd rather be next to you  
It's the only thing left to do

A motivated liquidated nightmare  
Like a baby with a laser on a rocking chair  
But I'd rather be next to you  
So Understand my point of view

Who knows the secret of life  
Who knows the score  
Black December  
... Little Darling

Trapped within a circle of my own creed  
I'm sitting dreaming tending to my own needs  
But I'd rather be next to you  
It's the only thing left to do

In half a day it's over and I lie there  
Recall the drama, happiness I've been there  
But I'd rather be next to you  
So understand my point of view

Who knows the secret of life  
Who knows the score  
Black December  
Rather be next to you  
Black December
