

The Future

Itchy Poopzkid

Back then I know for sure
So much more left to explore
Now days have turned to years
Turns out we're still stuck in here
What happened to our dreams?
The bags are packed but do we ever leave?

Crazy or natural
Risky or plain beautiful
How much more time to kill
Come with me say 'Yes I will'
Remember what we we talked about?
No regrets no money and no doubts

Our future has begun
Fucked up and on the run
We are in this together
One last chance to live forever

Let us be having fun
Like nobody has ever done
Fly high escape the blues
Or crash back down like Howard Hughes
Remember what we talked about?
No regrets no money and no doubts
