

# Souls of Fire

Ivanhoe

Darkness is falling  
They reach for my soul  
I can't see a hole in my brain  
Since my self-destruct you know  
Oh I can't believe they wanted you  
Now I live like a shadow  
Can't handle the truth  
No fear no eyes no tears!

Dance with myself  
Far away from the shadows  
Realize it's a million to one  
It can make you cry feels so good inside  
We try to find a saving solution  
Old frozen memories of the mind  
No-one should ever find

The times have changed  
Falling into disarrance  
Something between us  
Your eyes are so strange  
Fall down from the sky  
Loneliness inside  
Now cry and fill the shadows with the....

Souls of fire  
They're falling between us  
Falling inside  
Still falling between us  
Far away from the sun

Memories have slipped away  
Emotions have changed  
I can't believe we're patients of no-one  
Everytime spreading the old ones disease

Now we cry  
Spread the disease it's so close to your dead life  
They won't survive my trial yes  
An other black hole in the killing zone  
A little more mad in the methedrome  
I've wasted my time in the shadows  
Yes solutions  
Solutions.

The times have changed  
Falling into disarrance  
Something between us  
Your eyes are so strange  
Fall down from the sky  
Loneliness inside  
Now cry and fill the shadows with the....

Souls of fire  
They're falling between us  
Falling inside  
Still falling between us

Far away from the sun
