Wait

Ivanhoe

What time is life What is the reason for When you start thinking Feel an inside war

We'll live the morning With love, no fear, or hope No hopeless memories But it's cold outside oh

Should we go on Should we try running on Tell us the difference Of dark or light The other side

Time is the only thing you can't waste When you thought that love's life hate And you've seen them at your backroom door So you watched inside an eternal flame

Can't you feel, it burns in your brain To believe that you're trapped in chains When you turn out the lights The masters eyes Will be around, you were warned But now you're on an eternal way, well

Where should I go on Where are the angels from Live between the lines Wait leaders don't wait When you searched me To find security

Feel the eyes of a midnight star If they're around you'll live so far So if you see the eyes of a fallen man When you're near me, we'll hear the lies And you'll call me once again We're watched by our master's eyes

When we need, all our master's help Do we breath a better air? Leaders walk in the morning sun Leaders say you're the chosen one
