

## Wish It All Away

Ivy

Come a little closer and I will stay with you  
Let me turn your collar up, up to face the moon  
Come a little closer, may I fight with you  
I can try to make you see there's nothing you can do

Breathe the scent of a world gone sour  
Turn your head as the last spring flower dies now  
Close your eyes now

And wish it all away  
wish it all away

May I come and fight with you?  
I can try to make you see it's not in what you do

Breathe the scent of a world gone sour  
Turn your head as the last spring flower dies now  
Close your eyes now

And wish it all away  
wish it all away

Breathe the scent of a world gone sour  
Climb to the top of a windy tower in your mind  
Your mind  
Close your eyes now

And wish it all away  
wish it all away
